

FROM GREY TO GREEN. CAN CITIES BE TRANSFORMED?

Designing our future with a new approach to urban forestry solutions and training

Rapid urbanisation and climate change are some of the greatest challenges our society has ever faced. Uforest focuses on **promoting and innovating urban forests** as crucial contributors to greener, healthier and more resilient and liveable cities. The Uforest partnership combines **universities, businesses, and public institutions**. Together, they develop, promote and deliver more inclusive and participatory training to implement innovative urban forestry projects. Completing the Uforest training will make you into better informed, proactive and problem-solving urban foresters. Finally, Uforest aims at maximising the economic, environmental, and social benefits of urban forests.

JOIN

Who will help innovate urban forestry?

We are team-players and believe that joining forces is fundamental to achieve impactful innovation. Urban forestry is an interdisciplinary field, and requires networking, engaging and consulting with a wide range of different stakeholders to be successful. That is why we have connected organisations and professionals from all backgrounds to work together and renature cities. **Join our global network on urban forestry innovation, education and training!**

LEARN

Where does the innovation start?

We learn from current best practices, develop research and analyse needs, producing reports and case study factsheets. From what we learn, we develop high-quality learning materials and tailored urban forestry training, including high-quality online courses. **Learn with us and become an urban forestry expert!**

GREEN YOUR CITY

How can we turn theory into practice?

We help people develop their projects in urban forestry, consolidate their knowledge and build a network to help bring their idea to reality. We do that through our practical activities, such as an intensive innovation programme, urban forestry workshops with international experts, and urban forest planting campaigns. **Get involved and help us transform cities from grey to green!**

Build greener and more liveable cities: Participate, Learn & Get Involved at www.uforest.eu!
